

ECOPlus Plaques

Meeting the needs of Today, without compromising Tomorrow.

Finally a line of Recognition Awards that are Truly Environmentally-Friendly

All ECOPlus products exceed current and emerging environmental standards in every way from recycled content, to the use of renewable resources, low VOCs and use minimal 100% recycled and recyclable packaging materials

Products you can be truly proud to give or receive.

Eco Friendly Recognition Responsibly Crafted in Canada

What makes EcoPlus plaques different?

As a family owned and operated awards manufacturing company since 1961 we have seen many trends come and go, but Eco Friendly products are here to stay. Over the past few years we have had more and more companies insisting that the awards we make for them be truly eco friendly. Not just promoted as such but actually have third party certification to prove it as part of their commitments to be environmentally responsible companies.

We have made a commitment to do our very best in all areas of our company, to come up with products and manufacturing processes to make the most Eco Friendly products possible.

PlybooPure
UREA FORMALDEHYDE-FREE

A member of the grass family bamboo is the fastest growing plant on the planet. It reaches maturity in 3-5 years in organically grown forest without using fertilizers or pesticides and is harvested in an environmentally safe way.

	Forest Stewardship Council FSC Certified Cert no. SW-COC-003124 © 1996 FSC		CHPS Compliant Meets Materials Specifications for VOC emissions section 01350
	SCS Certified California Section 01350 requirements for low VOCs SCS-EC-10.2-2007		Qualifies for LEED credit MRC7 Indoor Environmental Quality: 4.4 Low-Emitting Materials No Added Urea Formaldehyde
	Rainforest Alliance Certified

Meeting the needs of Today, without compromising Tomorrow.

PlybooPure
UREA FORMALDEHYDE-FREE

PlybooPure is the worlds only Formaldehyde-free FSC-certified bamboo.

Made from Moso bamboo harvested from a forest that requires no irrigation, fertilizers or pesticides. Each year, only 20% of the plantation's bamboo is cut, ensuring the forest canopy remains intact and the ecosystem is not disturbed. As of the fall of 2009 all PlybooPure will not only be formaldehyde-free but made with a patented bio based zero-VOC glue derived from soy called Soybond.

arreis[®]
When the earth demands affordable excellence

Arreis[®], a sustainable medium density fiberboard (MDF) panel manufactured from 100% post-industrial recycled wood residuals, meets the most stringent formaldehyde emission standards in the world. SierraPine's patent pending manufacturing process utilizes a formaldehyde-free adhesive system to produce Arreis[®], the ideal sustainable design fiberboard (SDF) for commercial interior applications.

	Potential of 6 LEED [®] Credits Supported Materials & Resources: 4.1, 4.2, 5.1, 5.2, 7 Indoor Environmental Quality: 4.4		EPP Certified Composite Panel Association Environmentally Preferable Product
	Forest Stewardship Council FSC Certified (Mixed Credit) Cert no. SCS-COC-001409 © 1996 FSC		CHPS Compliant Meets Materials Specifications for VOC emissions section 01350
			SCS Certified Post-Industrial Recycled Wood Fiber No-Added Formaldehyde

Being a truly Environmentally Friendly product.

All EcoPlus products are made with the most environmentally friendly products possible. Not just one part of the product. We have done over 2 years of research to find the best of the best for each product.

- Bamboo that is FSC certified, from managed forest, organically grown without pesticides or fertilizers and is manufactured with Soybond™ a non toxic bio-based adhesive that is urea-formaldehyde free.
- MDF (medium density fiberboard) third party certified to be made with 100% recycled wood fiber and FSC certified wood without the use of urea-formaldehyde glues.
- Water based low VOCs (volatile organic compounds) finishes.
- Minimal packaging that is made from 100% recycled and recyclable paper.

CAUTION

make sure you ask

Many products on the market today claim to be eco-friendly that may not be. Many use non FSC certified bamboo, Urea Formaldehyde glues (a known carcinogen) and toxic finishes with high VOCs and still promote that they are an eco-friendly product.

NBD ~ Natural Bamboo double side bar with full colour print

ABD ~ Amber Bamboo double side bar laser engraved

NBS ~ Natural Bamboo single side bar with full colour print

AIW ~ Arreis white with full colour print

NBD ~ Natural Bamboo double side bar with full colour print on an aluminum plate

ABS ~ Amber Bamboo single side bar with full colour print

The aluminum plate is made with 85% post consumer RECYCLED aluminum and is 100% RECYCLABLE aluminum from recycled material requires only ~5% of the energy required to make new aluminum
